Business Update Highlights

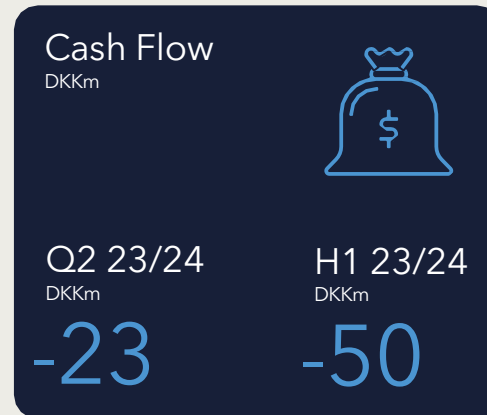

- **Revenue** for Q2 2023/24 reached DKK 125 million (Q2 2022/23: DKK 180 million). Revenue for H1 2023/24 amounted to DKK 207 million (H1 2022/23: DKK 388 million). The positive development in revenue between first and second quarter reflects that a number of customers have reduced their inventory and have started placing new orders.
- **Gross margin** for Q2 reached 45.6%, which is a reflection of both product mix and an overall increase in revenue, compared to Q1 2023/24.
- **Supply chain** is normalizing and we have continuous focus on driving down component inventory. In order to strengthen our production partner footprint, we have successfully established a partnership with a new EMS in the Philippines, where we started mass production, during Q2 2023/24.
- **Capacity costs:** We have exercised cost cautiousness in capacity costs and organizational development, and in parallel increased customer focused activities. This is reflected in the lower cost level compared to last year.
- **Strategic contract in Healthcare** signed in November 2023 - development is progressing, with first product launch expected in the second half of 2024.
- **Outlook** for 2023/24 is maintained. The positive development in revenue between first and second quarter reflects that a number of customers have reduced their inventory and have started placing new orders. We expect to continue to see improvements in the coming quarters. The outlook still is subject to uncertainties, particularly in the Pro-Audio segment, combined with the timing for reaching a normalized production and delivery pattern. However, we maintain our outlook for the year, as previously communicated in the 2022/23 annual report.

Revenue for Q2 DKK 125.2 million

Revenue for Q2 ended at DKK 125.2 million compared to DKK 180.0 million in Q2 last year. Revenue for H1 ended at DKK 207.1 million compared to DKK 387.5 million in Q2 last year.

Gross margin for H1 at 42.9 %

Gross margin is primarily impacted by the revenue mix of products, but also the low volume in the first half year. The Q1 delivery of low-margin products is expected to be balanced by higher-margin products in the remaining quarters and we have seen a higher gross margin in Q2 at 45.6 % compared to 41.2 % in H1 last year.

Capacity costs cautiousness

Capacity costs for H2 2023/24 reached DKK 129 million, compared to DKK 132 million in H1 2022/23. The lower capacity costs is a result of cautiousness in capacity costs and organizational development.

EBITDA for Q2 DKK 0.9 million

EBITDA for Q2 ended at 0.9 million, compared to DKK 7.8 million last year and is a result of lower revenue from product sales. EBITDA for H1 ended at DKK -29.5 million compared to DKK 49.8 million last year

Total equity and liabilities	467.0	547.0	201.0
Equity ratio	69.7%	63.3%	65.2 %

Working capital

Reduction in working capital primarily due to reduced revenue in H1 and determined focus on reduction of inventory.

Intangible assets

The increase in intangible assets is impacted by the investment in strategic collaboration with a large global Healthcare company regarding a new generation of wireless infrastructure for patient monitoring solutions.

Inventory

Inventory decreased by DKK 8 million in Q2, and the supply chain is normalizing, where our production partners source the components as the main rule. Further reductions in component inventory is expected throughout the year.

Our purpose is to help
people perform at their best.

We provide our customers with the best possible
wireless communications solutions, allowing their
customers to seamlessly connect and communicate.

RTX and our market position

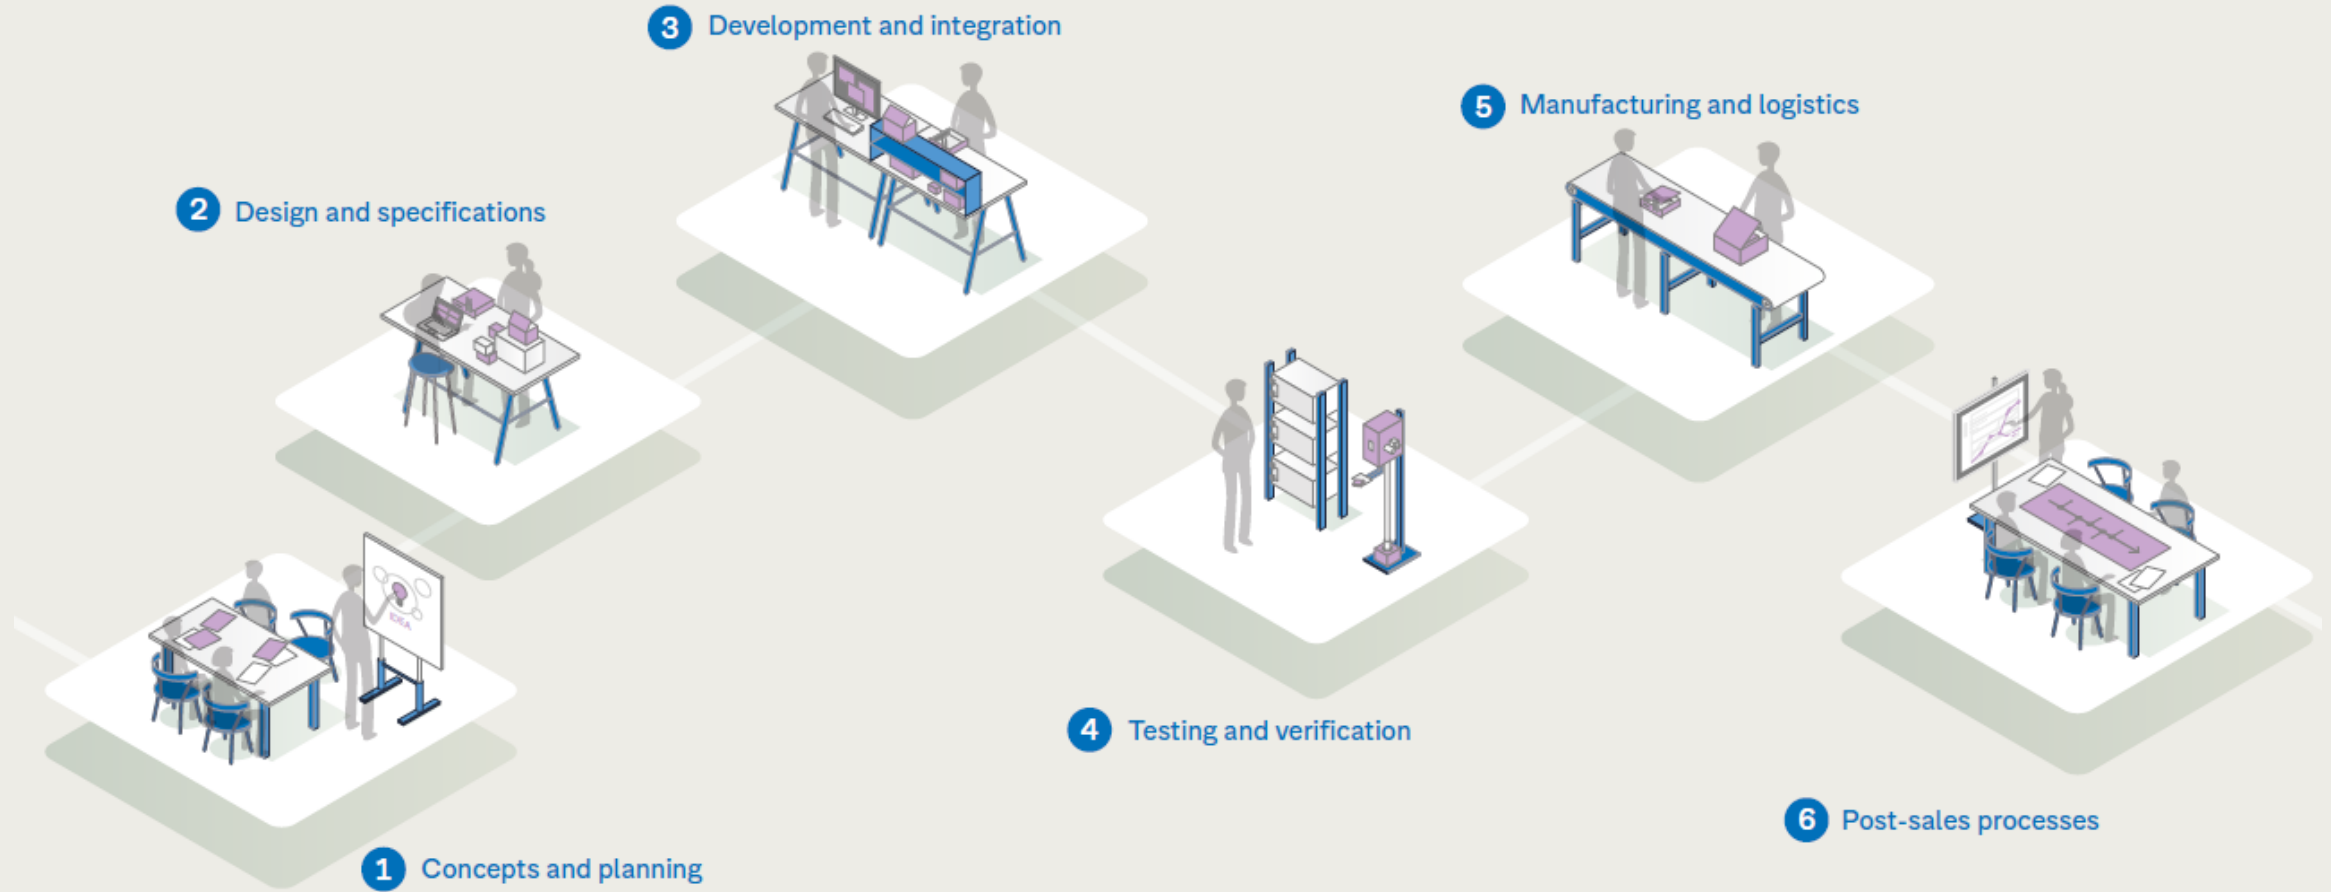

Multiple horizontal layers

RTX - A solutions provider

- RTX operates mainly in the spectrum of development as an ODM/OEM.
- Providing a range of services; including product customization, technology integration, and end-to-end solutions encompassing full product lifecycle management.
- Through long-term partnerships we seamlessly align with our customers' development processes and operations.
- As a pure-play solutions provider, we refrain from directly marketing and selling RTX products and solutions to end-users. Our primary focus revolves around serving as an ODM/OEM for our customers and as a true partner we tie our earnings to our customers' market success.

How we work

Customers and Partnerships

Global B2B customers

RTX's wireless solutions enable our B2B customers to market **reliable**, **secure**, and **scalable** systems with **seamless integration** to meet their specific communication and monitoring needs and respond to market demands.

Long Term Ambition 2025/26

Interim Financial Report for Q1, 2023/24

- Long-term ambition in 2025/26:**
 Revenue above DKK 1 billion
 EBITDA margin above 16%.
- Normalized revenue patterns** with revenue of existing products of DKK 600-700 million. Returning to normalized order horizons and delivery patterns of products for both RTX and our customers.
- New business**
Enterprise segment: new product categories (wireless headset), new subsegment (retail) and a broader customers base and new OEM distribution channels.
ProAudio is characterized by cooperation with key global players in the segment. New business coming from our module business, as more and more customers will bring new products to the market using our modules.
Healthcare With the contract signed in November 2023, we now have the possibility to reach customers in the Healthcare segment.
